

Forearm Training Progress Checklist

Your comprehensive guide to building stronger, more capable forearms

Progress: 0%

0/20

Knowledge & Planning

Understand basic forearm anatomy

Know the difference between flexors, extensors, and brachioradialis

Have a clear training goal

Define whether you're training for strength, size, endurance, or health

Value consistency over intensity

Recognize that regular, proper training beats occasional intense sessions

Follow a structured routine

Have specific days, exercises, and sets/reps planned out

Training & Technique

Apply progressive overload

Consistently increase weight, reps, or time under tension

Use full range of motion

Complete stretches and contractions in every repetition

**Prioritize proper form**

Never sacrifice technique for heavier weights

**Train all forearm functions**

Include flexors, extensors, crush grip, support grip, and pinch grip

Prevention & Recovery

**Warm up properly**

Perform wrist circles and dynamic stretches before training

**Train extensors regularly**

Use bands for extensor work at least twice weekly

**Listen to your body**

Stop immediately if you feel sharp tendon pain

**Respect rest days**

Allow adequate recovery between intense sessions

**Get sufficient sleep**

Aim for 7-9 hours of quality sleep nightly

**Stay hydrated**

Drink at least 3 liters of water daily

Nutrition & Fuel

**Consume adequate protein**

Approximately 2g per kg of body weight for muscle repair

**Maintain balanced nutrition**

Include complex carbs and healthy fats in your diet

**Consider strategic supplements**

Creatine and Omega-3s can enhance performance and recovery

Tracking & Progress

**Keep a training log**

Record exercises, weights, and repetitions

**Take progress photos**

Document visual changes every 4 weeks

**Perform strength tests**

Regularly test max Farmer's Walk weight or Dead Hang time

Complete the Checklist for Your Results

Check off the items above to see your personalized training analysis and recommendations.

Based on comprehensive forearm training principles | Use this checklist every 4-6 weeks
